

# ExceReg™

Biological Surgical Graft

powered by basement membrane technology

## A Novel Biological Surgical Graft

for inguinal hernia, abdominal hernia, hiatus hernia, parastomal hernia and pelvic surgical isolation

### Effectiveness

Low recurrence  
Functional regeneration

### Safety

Low seroma rate

### Convenience

Easy to spread  
High pliability  
High transparency

### Certification Information

● FDA 510(K) ● ISO13485 ● MDSAP

data from a clinical RCT <sup>[1]</sup>

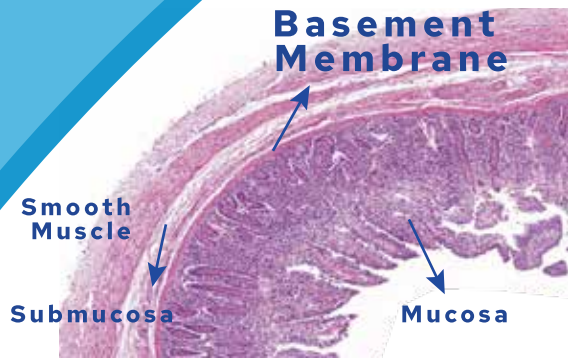

0%

Recurrence rate

0%

Seroma rate

## About Basement Membrane

### ● Rapid self-repair

Basement membrane is an extracellular matrix structure that supports the rapid metabolism and self-repair of cells in the body.

### ● High homologous

Basement membrane exhibits a remarkable structural and compositional consistency across various species, individuals, and different organs.

### ● Biological activity

Basement membrane is rich in bioactive components, which induce rapid proliferation and differentiation in the implantation site, facilitating organized tissue regeneration.

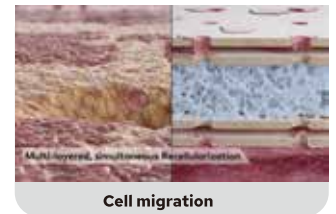

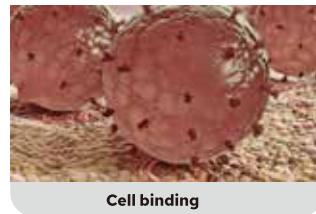

## Product Information

### Specifications

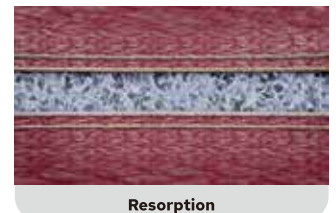

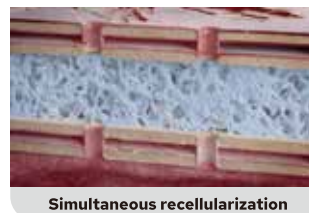

5cmx8cm	5cmx10cm	5cmx15cm	5cmx20cm
5cmx25cm	5cmx30cm	6cm	6.5cmx14cm
7cmx10cm	7cmx14cm	7cmx15cm	7.5cmx15cm
8cmx15cm	10cmx10cm	10cmx12cm	10cmx15cm
10cmx20cm	10cmx25cm	10cmx30cm	12cmx12cm
12cmx15cm	12cmx20cm	13cmx17cm	15cmx15cm
15cmx20cm	15cmx25cm	20cmx20cm	20cmx25cm
20cmx30cm			

## Basement Membrane Technology

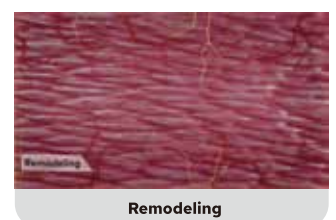

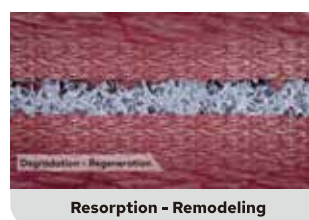

### ● ZR MedTech's ExceBM™ Technology

*This innovative distinctive regenerative pattern provides an isolated microenvironment at the early stage of the regeneration.*

*Guided by special architecture, multilayers of new cells are quickly reconstructed before the matrix resorption.*

*The entire remodeling processes can be accomplished in created steady-going environment to ensure an outstanding regenerative result.*
